KL had raised an issue over the past few weeks with DRBC. DRBC is holding an expert panel meeting on their eutrophication model on 3/17. They haven't had a WQAC meeting since last July. There are a number of projects that will contribute to the success of their efforts to change the DO criterion and put requirements in place beyond the model. John agreed to host a webinar on Wednesday to give us presentations on those projects. Please attend and invite others who might benefit from knowing this info. I realize that this is very short timing, but it is a good opportunity.
